Week 12 Assessment:

1. What do the red regions in a section view in Onshape mean?

2. How do you measure the distance between two surfaces in Onshape?

3. What must each part have before Onshape can report accurate Mass Properties?

4. What file type should be exported to 3D-print something from Onshape?

5. Does the Onshape Mobile App allow you to edit your design via a phone or tablet, or is it just a "view-only" app? What's another common use case?
